

SOURCING NATIVE SEEDS AND PLANTS ACROSS CANADA'S ECOZONES

Find the right native plants and seeds for your campus' ecozone.

Some species, such as milkweed, do well in many regions of Canada; others are much more specialized. It's best to reach out directly to the native plant nursery nearest to your campus.

For more information:

- [In the Zone: Gardens that help native species thrive](#)
- [Habitat Acquisition Trust](#)
- [Nature Conservancy of Canada](#)
- [Clean Nova Scotia](#)

- [North American Native Plants Society](#)
- [Native Plant Society of Saskatchewan](#)
- [Invasive Species Council of BC](#)
- [Memorial University of Newfoundland](#)

ECOZONES are large geographical regions within which the plant and animals communities are largely the same.

RESOURCES AND LINKS

Numerous resources are available to help answer your gardening questions. The resources here focus on gardening in the context of habitat creation.
